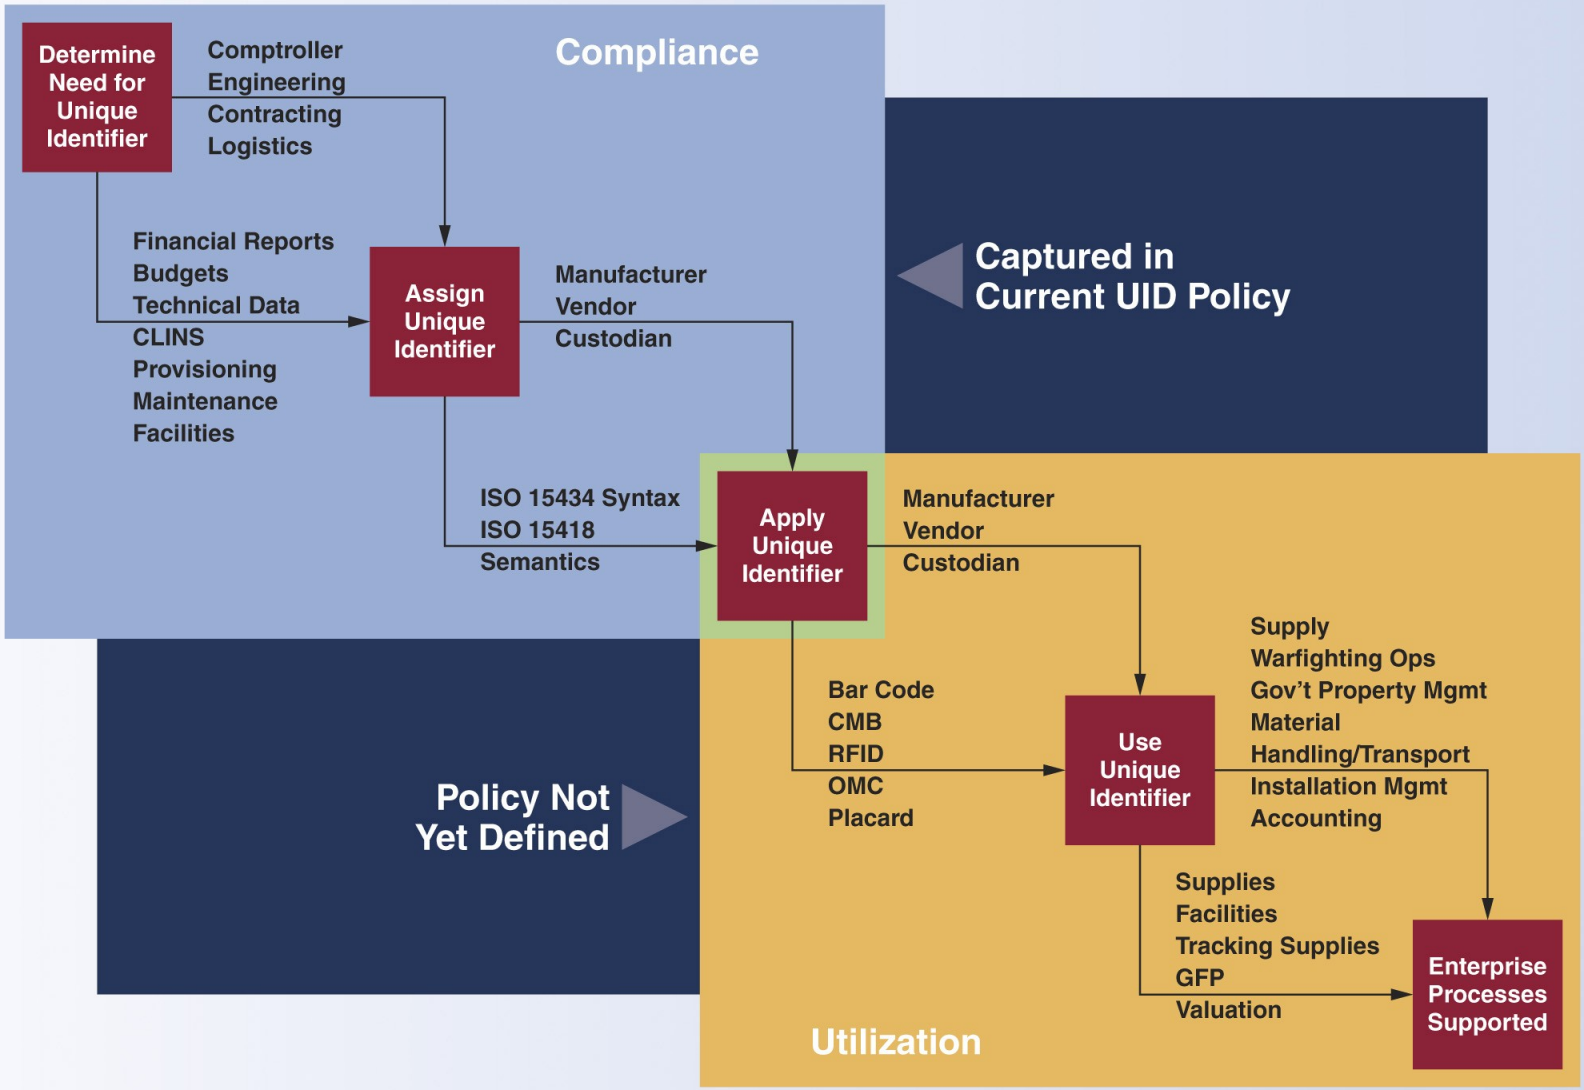
Understanding the DoD's Vision – Compliance to Utilization



Defense contractors share many of the same Issues/Concerns

- ***Legacy systems and processes all with varying data requirements were not designed to meet evolving UID needs***
- ***UID Compliancy required on growing number of contracts – affecting some deliverables now***
- ***Business units accustomed to solving problems at the program level exploring independent solutions to respond to UID***
- ***DoD policy and DFARS continue to evolve - requires dedicated development team to ensure UID solutions remain compliant***
- ***Budgeting demands for development and implementation activities***

All of these consuming significant resources … be they people, time, or $$s, and adding risk of "non-compliance"

I-GUIDES™ Compliancy

Web-based Data Management tool enables UID compliancy

- ***Meets All DoD Requirements,***
- ***Development Team in place to respond to evolving DoD requirement***
- ***Minimizes Organizational Impact***
  - ***Production Management***
  - ***IT***
- ***Facilitates Rapid Implementation***
- ***Platforms User for UID Utilization***

Why Choose I-GUIDES?

- ***A Proven System***
- ***DoD Compliant today and in the future***
- ***Designed with the end user in mind***
- ***I-GUIDES solutions are sized to meet your needs***
  - ***I-GUIDES application license purchase***
  - ***I-GUIDES Web Service subscription***
